Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Trina J. Duffin provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

U.S. Agricultural Exports Rising (see p. 2). U.S. agricultural exports rose \$3.7 billion during the first 7 months of FY 1989, totaling \$24.6 billion, 17 percent higher than during the same months of FY 1988. Increased corn exports and higher prices for grains and oilseeds were primarily responsible for increased export value. Exports of grains and grain products totaled \$3.2 billion higher in 1989, while oilseed and oilseed-product exports fell \$250 million, and cotton exports fell \$350 million. Exports of most other products increased.

Rankings Change for Major Agricultural Exporters (see p. 6). The United States, France, the Netherlands, West Germany, and the United Kingdom were the top five agricultural exporters during 1986-87. Brazil fell from fourth place during 1983-85 to seventh in 1986-87. Argentina fell from ninth place in 1980-84 to 14th in 1986-87. Although the United States has remained the top agricultural exporter, its world market share fell from 16.8 percent in 1983-85 to 12.4 percent in 1986-87.

U.S. Imports from an Expanding European Community Increase during 1958-88 (see p. 12). EC exports to the United States climbed from \$203 million in 1958 to \$4.1 billion in 1988 as the EC expanded from 6 to 12 countries. French and Italian wines, German beer, Danish hams, Spanish olives, and Belgian chocolate boosted EC exports.

U.S. Exports Climb 40 Percent under Credit Guarantee Programs (see p. 17). Shipments of farm products under credit guarantees amounted to \$3.7 billion in FY 1988, up 40 percent from the previous year's level. Movements under short- and medium-term guarantee programs accounted for about 10 percent of total U.S. agricultural exports. Mexico, Iraq, Korea, and Algeria were the largest importers using credit guarantees. Wheat, corn, and soybean products were the leading commodities.

U.S. Agricultural Exports Rising

U.S. agricultural exports rose \$3.6 billion during the first 7 months of FY 1989, totaling \$24.6 billion during October 1988-April 1989, 17 percent higher than during the same months of FY 1988. Increased corn exports and higher prices for grains and oilseeds were primarily responsible for increased export values. Exports of grains and grain products climbed \$3.2 billion in 1989, while oilseed and oilseed-product exports fell \$291 million, and cotton exports fell \$356 million. Exports of most other products increased.

The value of U.S. corn exports rose 71 percent during the first 7 months of FY 1989, reaching \$3.8 billion. Export volume rose 5.4 million tons, while the average export price increased from \$87 per ton in 1988 to \$123 per ton. Corn shipments to the USSR alone rose nearly 7 million tons as the Soviets aggressively pursued livestock production despite poor feed grain and forage crops. The Soviets also made their first significant purchases of U.S. sorghum (508,000 tons) during the first 7 months of FY 1989.

U.S. corn shipments to Asian customers fell about 2 million tons from a year earlier, led by a 1.5-million-ton decline in exports to East Asia. Japan's livestock industry is growing slowly as meat imports rise.

Higher Wheat Prices Offset Reduced Shipments

The value of U.S. wheat exports rose \$1 billion despite a 10-percent decline in volume. October-April exports totaled \$3.4 billion and 21.4 million tons. The average export price was higher during FY 1989 partly because market trading prices were higher for wheat and other drought-affected commodities. However, smaller Export Enhancement Program (EEP) bonuses boosted average U.S. export prices for wheat even higher compared with 1988. Higher world prices after the appearance of drought during the summer of 1988 enabled the United States and the EC to narrow the price difference between domestically traded wheat and wheat shipped under export expansion programs. Since about 60-70 percent of all exported U.S. wheat has recently been sold under the EEP, the average price of all wheat exports rose faster than prices for other drought-affected commodities. During the first 7 months of FY 1989, average export prices for wheat rose 58 percent from the same period 12 months earlier. Corn, sorghum, and soybean prices rose, respectively, 41, 37, and 33 percent. Barley prices rose 63

percent, reflecting the large role EEP played in barley as well as wheat exports.

Oilseed and Cotton Exports Slow

The value of oilseed and product exports fell 5 percent to \$5 billion in FY 1989, a \$291-million decline. Soybean exports fell \$352 million, but exports of protein substances, peanuts, and other oilseeds offset some of the losses suffered in exports of sunflower-seeds and vegetable oils as well as soybeans. Soybean exports fell in the wake of drought-boosted prices for soybeans that reduced consumption in key importing countries and reduced the U.S. share of world trade. Export volume fell 5.3 million tons from October-April of FY 1988 as exports to the EC fell 3.2 million tons and exports were lower to Japan, Taiwan, Korea, Brazil, and the Soviet Union.

The volume of soybean meal exports also fell as exports to the EC shrank but not enough to completely offset increased prices. A 781,000-ton decline in shipments to the EC helped reduce total shipments from 4.3 million tons during October-April 1988 to 3.6 million tons in 1989. Exports were also lower to Canada, Iraq, and Eastern Europe, but higher to Mexico, Venezuela, and Algeria. Exports to countries outside of the EC increased slightly. With decreased shipments to the EC and higher shipments elsewhere, the EC's relative importance as a market for U.S. soybean meal decreased in 1989. As recently as FY 1982, the EC was the destination for 68 percent of all U.S. soybean meal exports. By the first 7 months of FY 1988, this proportion had fallen to 30 percent, and in 1989, just 14 percent of all U.S. soybean meal exports were destined for EC ports.

The value of U.S. cotton exports fell 24 percent in FY 1989 as foreign suppliers increased sales at the expense of U.S. market share. Prices were also lower than 12 months earlier during much of the October-April period, although both prices and the U.S. competitive position improved. An increasingly favorable outlook for China's cotton consumption and imports and decreased supplies in other exporting countries made U.S. cotton increasingly competitive as FY 1989 progressed. Although export volume during October-April of FY 1989 was 15 percent lower than the same period in FY 1988, export volume in April 1989 exceeded that of the previous April, a first for any month during FY 1989. October-April cotton exports were lower to most destinations except China, who

was not a customer for U.S. cotton during the first 7 months of FY 1988 but who imported 96,000 tons in FY 1989.

High-Value Exports Continue Growing

U.S. exports of high-value products (HVP) set a record pace during the first 7 months of FY 1989 as both horticultural and livestock product exports reached record highs. Meat exports proved particularly strong compared with a year earlier, rising \$440 million, the largest increase of any significant nongrain commodity. Increased import demand overseas and the lagged impact of 1988's falling dollar were factors boosting HVP exports in general and especially for meat. Japan is the major market for U.S. meat exports, and, during 1989, Japanese liberalization more than offset the initiation of a more restrictive import regime in the EC. Japan accelerated the liberalization of beef imports in 1988, and U.S. meat exports began rising strongly in March of that year as exporters prepared for the start of Japan's new fiscal year in April. A U.S.-Japan agreement in July 1988 assured more sales, and by April 1989, year-to-date U.S. fresh beef exports were 58 percent above their year-ago level.

The EC's prohibition of imported meat from hormone-treated livestock reduced U.S. meat exports to Western Europe by \$25 million, but meat exports to Japan rose almost \$300 million, to Mexico \$96 million, and to Korea \$55 million. Mexico raised its imports to slow inflation, while Korea increased its openness to beef imports. Increased demand from Mexico accounted for much of a \$102-million climb in U.S. exports of live animals, while U.S. poultry meat exports rose \$68 million because of expanding exports to Canada, the Caribbean, Hong Kong, Mexico, and Japan.

U.S. exports of horticultural products (fruits, nuts, and vegetables) rose \$204 million to \$2.5 billion during the first 7 months of FY 1989. Nut exports fell slightly, but fruit exports including juices rose \$54 million, and vegetable exports rose \$149 million. Vegetable exports were higher to most destinations, with Japan's \$55-million increase the largest. Fruit exports to some countries fell. Total fruit exports rose, however, on the strength of gains to East and Southeast Asia, with exports to Taiwan proving especially strong compared with 1988. (Stephen MacDonald, Commodity and Trade Analysis Branch)

Rankings Change for Major Agricultural Exporters

The United States, France, the Netherlands, West Germany, and the United Kingdom were the top five agricultural exporters during 1986-87. Brazil fell from fourth place during 1983-85 to seventh in 1986-87. Argentina fell from ninth place in 1980-84 to 16th in 1986-87. Although the United States has remained the leading agricultural exporter, its world market share fell from 16.8 percent in 1983-85 to 12.4 percent in 1986-87.

Despite stability among the world's 10 leading agricultural exporters, supply and price changes for particular commodities and countries and slowing world import demand caused shifts among the major exporters. For example, falling export values for coffee and soybean products caused Brazil to fall below the United Kingdom and Belgium-Luxembourg in 1986-87. Declining values for grain and soybean exports caused Argentina's drop in 1986-87.

The United Kingdom rose from eighth place (behind Australia and Canada) in 1984 to fifth place (behind West Germany), primarily on the strength of increased grain exports to the EC countries. Lower value and volume of grain exports caused Canada to decline from 7th to 10th place between 1985 and 1987.

Although the United States has retained its position as the world's leading agricultural exporter during the past 8 years, it has yielded some of its dominant world market share to the EC-12 countries (primarily France, the Netherlands, West Germany, the United Kingdom, Belgium-Luxembourg, Spain, and Italy). The 12 EC countries increased their combined market share from an average of 33.7 percent in 1981-82 to 41.7 percent in 1986-87. Only the United States outranked these countries individually as the largest agricultural exporter in 1986-87.

Market Shares of Major Exporters

The United States increased its market share of world agricultural exports from 18.4 percent in 1980 to 18.6 percent in 1981-82, primarily because of increased export volume of grains and soybeans. However, the U.S. market share fell to 16.8 percent in 1983-85 and to 12.4 percent in 1986-87, its lowest since 1970-72, because of falling export volume and prices of grains and soybeans. The market shares of France, the Netherlands, and West Germany, the second, third, and fourth leading agricultural exporters, increased

during this period. Their combined market share increased from 19.3 percent in 1980 to 23.7 percent in 1986-87.

As a trading bloc, the EC-12 was the world's largest agricultural exporter in 1986-87, with \$100.1 billion in exports. Excluding intra-EC trade, the EC was the second largest agricultural exporting region, with \$28.8 billion in exports in 1986-87. Agricultural export value and world market share for the EC increased between 1981 and 1986-87. For example, in 1980-81, EC agricultural export value averaged \$78.7 billion and represented 33.7 percent of world agricultural exports. In 1986-87, the EC's agricultural export value averaged \$100.1 billion and represented 41.7 percent of world agricultural trade. The increase in EC export value was concentrated primarily in intra-EC trade because EC trade with non-EC countries increased only slightly from \$28.3 billion in 1980-81 to \$28.8 billion in 1986-87. Intra-EC trade increased from \$50.5 billion in 1980-81 to \$71.3 billion in 1986-87.

Major Wheat and Wheat Flour Exporters

The 12 leading exporters of wheat and wheat flour (in wheat equivalents) accounted for about 95 percent of world export volume for these commodities in 1980-87. The top five exporters (the United States, Canada, France, Australia, and the United Kingdom) constituted 81 percent of the volume in 1980-85 and 82 percent in 1986-87. The United States accounted for about 37 percent of the world export volume for wheat and wheat flour in 1980 and about 41 percent in 1981-82. (U.S. exports increased to 45.1 million tons in 1981.)

U.S. wheat and wheat flour exports fell to 33.2 percent in 1983-85. U.S. exports fell from 43.6 million tons in 1984 to 26.5 million tons in 1986, drastically reducing the U.S. share of the world market by 9.8 percentage points to a 15-year low of 27.7 percent in 1986. U.S. exports rebounded in 1987 to 32.6 million metric tons, raising its world market share to 29.7 percent.

Major Corn Exporters

The 12 leading corn exporters in 1980-86 accounted for 96-98 percent of world corn export volume. The top five countries (the United States, Argentina, France, Thailand, and South Africa) made up 93.8 percent of world corn export volume in 1980 and 91.8 percent in 1981-82. The top five exporters changed in 1984 as drought in South Africa drastically cut production and exports during this period, and China sharply increased its production and exports during 1985-87.

Belgium-Luxembourg replaced South Africa as the fifth leading exporter in 1983-84. China surpassed Belgium-Luxembourg in 1985-86 with exports of nearly 6 million tons of corn, up from an annual average of 100,000 tons in 1980-83 and 900,000 tons in 1984. The rapid expansion in corn exports made China the third leading corn exporter in 1985 (behind the United States and Argentina) and the fourth leading corn exporter in 1986-87 (behind the United States, Argentina, and France).

The U.S. share of world corn exports was 78.5 percent in 1980 and about 68 percent in 1981-85 but 47 percent in 1986. The U.S. share rebounded in 1987 to 63.6 percent as U.S. production and exports increased rapidly after the 1986 drought. The other top exporters in 1984 (Argentina, France, Thailand, and Belgium-Luxembourg) and in 1985 (Argentina, China, France, and Thailand) increased their market shares during these periods of falling world demand. Exports from

these countries and South Africa, except from Belgium-Luxembourg, rebounded sharply in 1986-87.

Major Soybean Exporters

The five leading soybean exporters (the United States, Argentina, Brazil, China, and Paraguay) accounted for nearly all world soybean exports in 1980-87. The United States, the world's leading soybean exporter, shipped 81 percent of soybean export volume in 1980 and 86 percent in 1981-82. But, the U.S. share of world soybean exports fell to 75.9 percent in 1983-85, rebounded slightly in 1986 to 77.5 percent, then fell back to 74 percent in 1987. Paraguay and China increased their market shares of world soybean exports in 1980-87. Argentina's and Brazil's combined market share rose from 10.9 percent in 1981-82 to 17.8 percent in 1983-85 but fell to 14.4 percent in 1986-87. (Arthur Mackie, Agricultural and Trade Indicators Branch, Agriculture and Trade Analysis Division)

U.S. Imports from an Expanding European Community Increase during 1958-88

In 1958, the newly formed European Economic Community, then comprised of Belgium, France, Italy, Luxembourg, the Netherlands, and West Germany, exported \$203 million of agricultural commodities to the United States. Making up over half the total value were Dutch hams and tulips, French and Italian wines, Italian cheese and tomato paste, German beer, and Belgian flax. Imports from the EC that year accounted for 5 percent of the U.S. total.

Over the next 30 years, the EC would grow from 6 to 12 members, adopt a Common Agricultural Policy (CAP) among all its member countries, and increase exports of agricultural commodities to the United States to over \$4 billion in 1988, a 20-percent share of the U.S. agricultural import market.

The United Kingdom, Denmark, and Ireland joined the EC in 1973, Greece in 1981, and Spain and Portugal completed the EC-12 in 1986.

Policies Influence Trade

The CAP is founded on three principles: common pricing, EC preference, and common financing. CAP

smooths movement of agricultural products across borders of member countries and protects EC producers through a unified system of price supports, import levies, and export subsidies. In 1962, the EC implemented the first of the CAP regulations, involving grains, poultry, pork, eggs, and fruits and vegetables. Over the next 10 years, beef, milk, rice, vegetable oils, sugar, tobacco, wine, hops, seeds, flax, and silk were added to the list of commodities.¹

The CAP has had more of an impact on U.S. exports than imports. Favorable support prices boosted EC grain production by 31 percent to 174 million tons from 1979 to 1984 before declining to 155 million tons in 1987. At the same time, U.S. grain exports to the EC fell from 13.2 million tons to 4.3 million tons.

Casein, however, is an example of an EC commodity that benefits from U.S. domestic policy. It is the protein derivative from milk, used in this country to make low-fat cheese and other products. Because the United States supports the price of butter, cheese, and nonfat dry milk, it is less profitable to produce casein. Ireland benefits from CAP provisions on dairy products, which grant subsidies on skim milk that is used to produce

¹ Hudson, John F. "The Common Agricultural Policy of the European Community." FAS M-255, Nov. 1973, p 1.

casein. Irish casein has found a ready market in the United States.

The EC-6 Emerges

In 1957, a year before the formation of the EC, the six original members exported \$188 million of agricultural commodities to the United States. This total rose each year through 1970 at an annual rate of 7 percent, slightly above the rate of growth in global trade. While the fledgling EC increased its exports to the United States by 7 percent a year from 1961 to 1972, its exports to all destinations were doing even better, up 13 percent.

About 70 percent of EC agricultural exports are shipped among EC countries. This situation has been true for the EC-6, EC-9, EC-10, and EC-12. The U.S. share has been about 5 percent. Other suppliers were more established in the United States than the original EC countries and, in fact, exports from the EC-6 in 1960 of \$220.9 million were smaller than those of five individual countries (Brazil, \$495 million; Cuba, \$299 million, Colombia, \$245 million; the Philippines, \$241 million; and Mexico, \$223 million). EC exports then were smaller than those of Africa (\$332 million), South America (\$986 million), and Asia (\$850 million). U.S. import demand during the early 1960's was primarily for products like coffee, cocoa, rubber, tea, bananas, and sugar generally provided by developing countries. Half of all U.S. agricultural imports in 1960 were non-competitive products compared with 30-35 percent in recent years.

EC Adds Three

The addition of Ireland, Denmark, and the United Kingdom in 1973 increased EC exports to the United States by 60 percent (see figure). Danish hams and cheeses, Irish beef, and English biscuits now entered the United States as products of the EC.

The Netherlands was the leading supplier of canned hams to the United States even before the formation of the EC. The Netherlands, Denmark, and Poland had an 87-percent share of the U.S. market for imported canned hams in 1957. Denmark gradually surpassed the Netherlands during the early 1960's, and on the eve of its accession in 1973, supplied more canned hams to the United States than the Netherlands and Poland combined. This arrangement changed after Denmark's membership. Denmark reached its peak in 1972 (136 million pounds), the Netherlands in 1970 (81 million pounds). These figures then dropped 47 and 91

percent by 1979 as the leading suppliers of canned hams to the United States in 1980 became, in order, Poland, Denmark, Yugoslavia, Romania, Hungary, and the Netherlands.

Ireland's fortunes as a supplier of boneless beef have slipped markedly since it became a member of the EC in 1973. During 1967-71, Ireland averaged 67 million pounds of fresh boneless beef to the United States each year. During 1985-88, the average fell to less than 3 million pounds. The decline was swift, dropping from 69 million pounds in 1970, to 7 million pounds in 1975, to zero by 1977.

The United Kingdom found a market in the United States for racehorses, biscuits, chocolate, and confectionery products. After losing a market for fresh beef, Ireland's sales stagnated until it found a market for casein. Denmark, like Ireland, relied in large part on sales of animal products (pork, cheese, and furskins) to the United States.

EC Expands In the 1980's

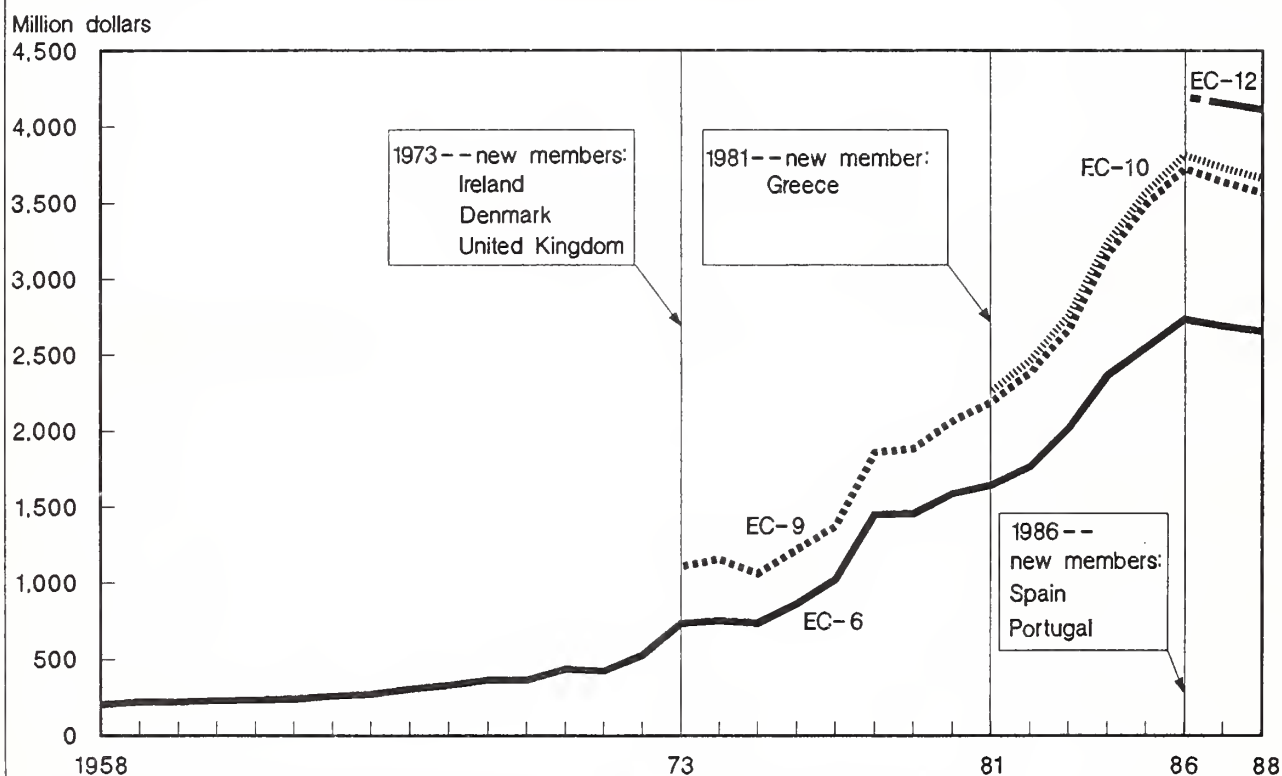

The EC expanded to the north in 1973 with the addition of Ireland, Denmark, and the United Kingdom. In the 1980's, the EC expanded to the south, to Greece in 1981 and Spain and Portugal in 1986, altering the mix of products within the EC with more warm-weather products. Until then, Italy was the only source of these products. Expensive filler tobacco from Greece quadrupled EC sales of tobacco to the United States from 1980 to 1981. Five years later Spain and Portugal added canned olives, olive oil, citrus fruit, and wine to the EC export market.

Spanish and Portuguese wines added to an already dominant EC position in the U.S. imported wine market. The EC supplied 95 percent of all imported wines to the United States in 1988, accounting for approximately 25 percent of total U.S. wine consumption. The surge in imported European wines during the 1980's was, in large part, due to the appreciation of the U.S. dollar. Imports of less expensive wines (less than \$4 a gallon) increased from 31.3 million gallons in 1980 to 64.9 million gallons in 1984. As the value of the dollar fell during 1985-88, imports of these less expensive wines dropped to 12 million gallons. Imports of the more expensive wines were not as responsive to the change in the dollar and remained at around 52 million gallons, falling only recently to 48 million gallons. (Stephen R. Milmo, Commodity and Trade Analysis Branch)

OCTOBER-APRIL IMPORTS UP 2 PERCENT

U.S. agricultural imports for October 1988-April 1989 were \$12.8 billion, up 1 percent from a year ago. The forecast for FY 1989, updated in May, was unchanged from the February forecast of \$21 billion. Noncompetitive imports of \$3.7 billion were 7 percent below a year ago, largely due to lower coffee and cocoa imports. Meanwhile, competitive imports of \$9.1 billion were 5 percent ahead of last year's record pace as a result of larger imports of fruits, vegetables, grain products, sugar, and vegetable oils.

U.S. agricultural imports from an expanding EC, 1958-88

1/ Original members of the European Community, 1958: Netherlands, France, Belgium, Luxembourg, Italy, West Germany.
2/ The Common Agricultural Policy (CAP) began in 1968.

U.S. Exports Climb 40 Percent under Credit Guarantee Programs

U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation (CCC) increased by almost 40 percent to \$3.7 billion in FY 1988. Exports under these programs accounted for about 10 percent of total U.S. export value.

The CCC makes short-term and medium-term credit guarantees available under two programs, the Export Credit Guarantee Program (GSM-102) and the Intermediate Export Credit Guarantee Program (GSM-103). These programs assist U.S. exporters by extending private, commercial credit to foreign importers of designated U.S. agricultural commodities. Under GSM-102, the CCC guarantees repayment of private credit for up to 3 years, while GSM-103 covers credit extended for 3-10 years.

GSM-102 has operated since FY 1981. The Food Security Act of 1985 authorized GSM-103, which began in FY 1986. Importers in 27 countries participated in one or both of the credit guarantee programs in FY 1988, which assisted exports of over 50 commodities. Sales under GSM-102 totaled almost \$3.4 billion, while GSM-103 accounted for \$294 million. These figures exclude lumber, leather, wood pulp, and veneer, which technically are not considered agricultural exports.

The largest importers under the credit guarantee programs were Mexico, Iraq, Korea, and Algeria. For the second year, Mexican importers purchased the largest amount, making up 25 percent of program exports. Importers in Mexico purchased \$923 million of agricultural commodities, mainly corn and soybeans, under GSM-102 and GSM-103. Importers in Iraq pur-

chased the second largest quantity of agricultural goods valued at \$810 million. Major U.S. exports to Iraq under the programs included rice, wheat, and corn. Thirty-five percent of the commodities shipped under the credit guarantee programs were purchased by importers in north African and Middle Eastern countries.

The programs boosted the exports of specific U.S. agricultural commodities. Wheat was the chief commodity exported under CCC credit guarantee programs, accounting for over 25 percent of all program exports. Wheat exports under CCC programs represented 22 percent of total U.S. wheat exports. The major destinations for wheat under the CCC programs were Egypt, Algeria, Korea, Iraq, Morocco, and Mexico. Importers in all of these countries except Korea used the CCC programs in conjunction with the Export Enhancement Program (EEP) to purchase wheat.

Corn exports under GSM-102 amounted to \$575 million, about 13 percent of CCC program exports. Importers in Mexico purchased over half of the corn, and importers in Morocco, Tunisia, and Jordan also purchased small quantities of corn, totaling \$27 million under the GSM-103 program.

Exports of soybeans, soybean oil, and meal, valued at \$773,000, constituted over 20 percent of FY 1988 exports under the CCC programs. The major destinations for CCC program-assisted soy complex exports were Mexico (soybeans), Algeria (soybean meal), Iraq (soybean meal), Pakistan (soybean oil), and Korea (soybeans). Credit guarantees assisted over 40 percent of U.S. soybean oil exports, 18 percent of soybean meal exports, and 7 percent of soybean exports. (Linda C. Beeler and Karen Z. Ackerman, Commodity and Trade Analysis)

INDEX OF APPENDIX TABLES

Exports

Table		Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-April 1987/88 and 1988/89, and April 1989	A-4
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-April 1987/88 and 1988/89	A-64
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-April 1987/88 and 1988/89	A-65
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-April 1987/88 and 1988/89	A-66
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1987/88 and 1988/89	A-67

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-April 1987/88 and 1988/89, and April 1988 and 1989	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-April 1987/88 and 1988/89, and April 1989	B-4

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and Northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3
